

## INTERRUPTS:

- 1) Hard panic - goes back to C. P.
- 2) Soft panic - fielded in current subprocess?
- 3) Accounting interrupts
- 4) Interrupts from friends.
- 5) Swapping interrupts

Nothing should be changed now.  
unless:

- 1) For a solid compelling reason (which  
or would affect the Septantor system)
- 2) The change is free.

Howard is in charge; if there's no  
consensus, things should be done  
Howard's way.

Bruce's scheme is linear & doesn't seem  
very inspiring to me, but if it handles  
the cases, so be it
