

Bugs

1. DEFINE('F()W') forgot to hash W.
2. FREESVD forgot to set B9 non-negative in case the SVD was empty.
3. A transfer through "LUNDF" clobbers A5 for the error printout.
4. APPLY() only set X5 = (#A.P.) LSH 18 when calling a standard procedure; also it bungled the case of its own X5 = 1.
5. DATA() & ARBNOL() each gave a ^(diff) ~~different~~ ^{wrong} error # when their argument was of the wrong type.
- ▶ 6. ABORT() & REMI() were left out of the QP table.
7. BUMP clobbered B6, and ((MAXSTAT)).
