

# Destroy in User-disk-service subproc:

- ① Find LFH - if file not locally open then error:
- ② Lock FHR if global open ct  $\neq$  1 then UNLOCK & error.
- ③ Scan ABR chain. if blocks in map then UNLOCK & error. ONE LEVEL
- ④ Set global open ct = 0 in FHR
- ⑤ Release ABR chain and LFH
- ⑥ Refund space in DAR (MYDAR) *none for one lev file*  
fixed {swapped} ECS
- ⑦ Leave file locked and send FHR addr + code (2) to CLOSER
